CodeAnt CI security scan

repository: codeanttesting/codeant-demo

commit: d860b95a2ef978cc9bfd188a35476a6e7bdb333e

run_url: https://github.com/codeanttesting/codeant-demo/actions/runs/42305066053

Example policy results

Scanner	Total findings	Policy verdict
secrets	1	FAILED
sast	9	FAILED
sca	38	FAILED

Scope and interpretation

Full repository results for secrets, SAST and SCA. This summary and the CSV are generated by the example workflow. The policy is defined in policy.json; it is separate from the native CodeAnt quality-gate verdict.

Native CodeAnt verdict: PASSED

See codeant-findings.csv for all findings and the Actions logs for runner diagnostics.
